### Powered by Passion, Inspired by Automation since 1978

"Today is a remarkable day as I have the opportunity to congratulate and thank the people of Epec and the representatives of Ponsse, for making it possible for us to celebrate this 40th anniversary by continuing the company and the heritage that I once started. As a young entrepreneur, I had a strong belief and many plans for the future. All of these plans have been exceeded. It hasn't always been easy, however, I have cherished the finest moments which have later evolved into stories," said Veikko Rintamäki, founder of Epec in his speech.

### Values – The basis of business identity

"Values can either be just words, or they can form a compass, with which an employee can navigate towards the right decisions every day. Values can be empty phrases, or they can provide the guidelines which direct the strategic planning in a business, ultimately resulting in the realization of its long-term goals and vision."

## Epec's Control Units Renew the Control of Tume-Agri Seeders

"Epec's control units and touch screen renew the control practices of Finnish Tume-Agri Oy's seeders. Instead of old mechanical controls, Tume-Agri's seeder – Draco – has information flowing between Epec's control units, touch screen, and electronic controls from the tractor to the seeder through a CAN bus. The operator can modify the machine's most important features with an easy to read touch screen and follow the progress of the seeding with live camera feed shown on the screen."
