Investments in Epec's factory for 2019

Epec factory continues investing in new production technology. Main investments in 2019 will be a new assembly robot cell, AOI-machine (Automatic Optical Inspection), a reflow oven for soldering process, module testing and assembly cell equipment

Sami Ojala started as a Control System Engineer at Epec Tampere office

Hello!

My name is Sami Ojala. I am a 25 years old automation engineer.

I work as a Control System Engineer at Epec's Tampere office. My first day at Epec was the 19th November 2018. I'm not sure if I can call it a first day, since this is actually my second time at Epec.

I worked as a Test Engineer at Epec in Seinäjoki from the end of the year 2015 to April 2017. During this time I was still studying at Seinäjoki University of Applied Sciences. I also did my Bachelor's thesis for Epec Seinäjoki.

After my graduation I went on to gain some experience in other fields of automation technology. I worked at Danfoss Drives Vaasa for several months and after that I moved to Tampere to work at Etteplan Design Center Oy.

Now I have the opportunity to come back to Epec. I needed to take some time to think about what I wanted to do. I decided that I want to be part of the Epec story: to deliver high quality Finnish control systems. And that's the kind of expert I wanted to be. However, life can't be just work so I value my spare time highly. I enjoy doing sports of all kinds, hiking in the nature and of course hunting and fishing.

Extreme challenges? Bring it on!

Sami Ojala

We want to thank you all for your cooperation throughout the entire year.
We wish you Season's Greetings and Best Wishes for the New Year 2019!

As our Christmas gift, we have made a donation to The Mannerheim League for Child Welfare's Christmas tree drive.

Deliveries during Christmas week

Please notice that we are not dispatching orders during Christmas week 24. - 31.12.2018.
