Epec releases a new version of the SC52 Safety Control Unit

Epec has made an update for the SC52 Safety Control Unit. The update includes both new hardware and firmware versions. The hardware change is related to the processor power-up. The existing HW version D00 has a slight possibility that the SC52 controller does not start in every case. This issue has been fixed in the new hardware version D01.

Epec has made an update for the SC52 Safety Control Unit. The update includes

DID YOU KNOW?

Did you know that Epec is the first Finnish company that has a TÜV Süd certified Safety Control Unit.

DID YOU KNOW?

Did you know that Epec's products are designed and manufactured in Finland? The designing and production are done closely together under one roof in Seinäjoki.

Meet Niko Mäkinen, our new IT Specialist

My name is Niko Mäkinen, I'm a father of two and a husband from Seinäjoki. Just before Christmas I had an opportunity to join Epec, a company I could easily relate to: local roots and born in the 70's. I knew Epec as a company with a good reputation and innovative products, so I took the challenge and started as system specialist in Epec's IT team this January.

I was previously working in the newspaper and publication industry for almost two decades, responsible for content management, integrations, databases and infrastructure, including virtualization of servers and applications. During that time I had the chance to be a part of the process of changing a traditional newspaper into a multichannel responsive publication.

During my out of office hours, when not having fun with the kids, I can most likely be found at the shooting range, practicing and competing in various disciplines of shooting sports. That is something that requires a 100% concentration on every stage and every time, so it helps me clear my mind during the weekends and gives me a fresh start on Mondays. On top of that, participating in voluntary defense training events from time to time is something that gives a little diversity in my everyday life.
